

Air 1 serves me as a resident in the local community by providing music that I can play at all times without having to worry about what might be said when I have young ones around. It's upbeat and positive and an aid to my entertainment. I need a new radio and Air 1 is the ONLY station I listen too. If it were taken away I will not go buy a radio. Air 1 exposes people to new music that they will in turn go buy. But they won't buy it if they don't know they like it. Therefore having no Air1 station will negatively effect business in the local community. So Air 1 is in the public interest for the growing population of people who would like clean alternative music, for business's who sell radios and music, and MOST definitely for me. Please , please, please find a way to keep this station on everywhere. It is needed more than wanted. Thank-you
